

AWARD - SOSTENIBILITA' IN AMBITO INDUSTRIALE

Turin, Italy, April 2022

Iveco Group

Who we are?

I V E C O • G R O U P is the house of unique, yet unified **8 Brands**:

- **IVECO**, a pioneering champion that designs, manufactures and commercializes heavy, medium and light duty commercial vehicles;
- **FPT Industrial**, a global leader in advanced powertrain technologies for agriculture, construction, marine, power generation and commercial vehicle applications;
- **IVECO BUS and HEULIEZ**, premium and mass transit bus and coach brands;
- **Iveco Defence Vehicles**, highly-specialised defence and civil protection equipment;
- **ASTRA**, a global expert in large-scale, heavy-duty quarry and construction vehicles;
- **Magirus**, the highly reputed firefighting vehicle and equipment manufacturer;
- **IVECO CAPITAL**, the financing arm which supports them all, serving as the cornerstone of Iveco Group's new business models.

Iveco Group

The Company and our Target

Iveco Group in numbers

* 23 Plants in Sustainability perimeter

Iveco Group challenges to 2030:

- **Targets in line with Science Based Target (1.5 °C ambition)**
 - **-50%** vs. 2019 in **absolute** CO₂ emissions at Company plants WW
 - **100%** of total electricity consumption from renewable sources

Energy Workshop

Workshop Suzzara 1-4 October 2019

Iveco Group annual training

- 3524 training hours
- 4153 people involved
- 100% plant involved WW

Suzzara Energy Workshop

- 1124 training hours
- 44 people involved
- 45% plant involved WW

Energy words hunt and award: team building to create a common sense of belonging

The workshop slogan: TREES ARE THE ROOTS OF OUR TOMORROW

"There is a magic machine that sucks carbon out of the air and builds itself: it's called a tree...."

From the technological tree to the real trees in leaves and roots, example of natural climate solution that branches out in all the plants of Iveco Group.

Energy saving projects

Smart Flower

One of the innovative project is the Smart Flower.

It is a high-efficiency photovoltaic system designed in such a way that the "petals" (the photovoltaic modules), just like the sunflower, track the sun maintaining an optimal angle of 90 ° with respect to the sun rays producing the maximum energy.

Thanks to the electric energy produced, services for the community are powered (e.i. electric bike recharging).

Our Smart Flowers have "blossomed" in Suzzara, (Italy), Valladolid (Spain) and Annonay (France), and will be adopted in other plants as well.

From the real trees in leaves and roots to the technological tree, example of natural climate solution that branches out in all the plants of Iveco Group.
